**Description:** Adapted from the original Gender Now Coloring Book, this activity book brings the Gender team into the classroom with more activities and stories to guide children in learning and understanding gender and its expression. Did you know that clown fish can change their bodies from boy to girl? Or that in some countries they know there's not just boys and girls? The Bugis of Indonesia have 5 genders! Gender is something relevant to all of us because we all express gender. You may or may not be transgender. You may or may not know a transgender child. The truth is that doesn't matter. We are all on this planet together. Gender Now is meant to provide reflection and support unity by showing multiple genders standing together. It is a specific opportunity to create balance and awareness by including gender expressions that are under-represented in our current culture.
